A container, circular, elliptical, or polygonal at top and/or bottom, the top diameter of which is somewhat greater than the bottom and usually less than the depth, having slatted or solid sides ventilated or non-ventilated, and a fabricated or solid bottom which may be loose or fixed in place, or formed by a continuation of the sides.

Reg. 1. Sec. 2. Par. 6. Round Stave Basket. A container usually approximately circular at top and bottom and usually of greater breadth than depth, the sides and bottom of which may be formed from a web of continuous or non-continuous staves or of non-continuous staves and a separate solid or built-up bottom piece which may be loose or fixed.

In testimony whereof I have hereunto set my hand and caused the official seal of the Department of Agriculture to be affixed in the city of Washington this 1st day of May, 1933.

Secretary of Agriculture.
